

PYAE SONE PAING

FRONT-END DEVELOPER

Myanmar | pyaesonepaing104@gmail.com | www.pyaesonepaing.com | github.com/peterpaing | LinkedIn

PROFILE

Front-End Developer focused on building responsive, polished web applications with React, Next.js, TypeScript, and Tailwind CSS. Skilled at translating product requirements into clear, intuitive interfaces, integrating APIs, and creating maintainable component-based experiences. Seeking a junior front-end or React/Next.js role where strong UI craft and continuous learning can create value.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, TypeScript **Frameworks:** React, Next.js, React Router
Styling & UI: Tailwind CSS, responsive design, component-based development
Tools & practices: Git, GitHub, REST API integration, browser local storage

SELECTED PROJECTS

Currency Exchange App | React, TypeScript, Next.js, Tailwind CSS, Frankfurter API

- Built a responsive currency exchange app for converting and comparing currencies across a clean, data-focused interface.
- Integrated the Frankfurter API and implemented conversion, multi-currency comparison, favorite pairs, and conversion-history features.

Kanban Task Management App | React, TypeScript, Next.js, Tailwind CSS, Local Storage

- Developed a responsive Kanban app with customizable boards and workflow columns for organizing tasks.
- Implemented create, edit, and delete flows for boards, tasks, and subtasks, plus task-status updates and local persistence.
- Added light and dark themes to improve usability across viewing preferences.
